

## **Redington Partners with Eastman to Expand Access to Made-in-India Solar Solutions**

- *The collaboration supports India's renewable energy mission by delivering locally manufactured solar solutions across the country*

**New Delhi, 14<sup>th</sup> July 2025:** Redington Limited (NSE: REDINGTON), a leading technology solutions provider and a Fortune India 500 company, announced the launch of solar solutions including solar inverters, batteries, and storage systems from Eastman Auto & Power Limited, an innovator in the energy transition space, across India.

Eastman Auto & Power Limited is a trusted manufacturer of solar modules, inverters, batteries, and energy storage systems (ESS). As part of the partnership, Redington will enable the seamless distribution of Eastman's solar solutions pan-India, strengthening local supply chains and supporting India's clean energy goals.

**Pradeep Srikanthan, Business Head, Redington Solar, said:** *"Redington, in complete alignment with the Government of India's Atma Nirbhar Bharat policy to promote manufacturing in India, is glad to have an indigenous solar solutions manufacturer onboard. Redington has been in the distribution of solar products for almost a decade and has enabled more than 3 GW of rooftop and ground-mounted solar installations across the country by supplying high-quality products to over 5,000 solar system integrators. Having Eastman Auto and Power Ltd. products in our portfolio will help drive the Make in India policy by distributing Made in India solar solutions to customers going solar under the flagship PM Surya Ghar Yojana program. The need for Made in India products has become exceedingly important for claiming subsidies, and with this addition to our bouquet, our channel partners will have greater choice and ease in supporting subsidy-driven initiatives by the Government of India."*

**Mr. Shekhar Singal, Managing Director, Eastman Auto & Power Limited, said:** *"We are delighted to partner with Redington, a trusted name in technology distribution. This collaboration reflects our shared vision of making Solar energy solutions more accessible, reliable, and future-ready. Eastman is well-equipped with a strong manufacturing ecosystem, a widespread service network, and deep-rooted industry partnerships. Through this alliance, we aim to further contribute to India's Solar energy mission and empower consumers with sustainable energy choices."*

This partnership marks a pivotal step in advancing India's solar energy ecosystem and accelerating the nation's clean energy transition. Combining Eastman's robust product portfolio—including Solar Inverters, Lithium Batteries, and Solar Panels—with Redington's strong capabilities in rooftop and ground-mounted solar projects, the collaboration will enable end-to-end solar energy solutions for customers across the country.

### **About Redington Ltd:**

Redington Limited, an integrated technology solutions provider and a Fortune 500 company, enables businesses in their digital transformation journeys by addressing technology friction – the gap between innovation and adoption. With presence across 38 markets through 60 subsidiary offices, over 290+ associations, and 40,000 channel partners, Redington enables seamless and end-to-end distribution for all categories of IT/ITeS, Telecom, Lifestyle, and Solar products in India, Singapore, South Asia, Middle East, Africa and Turkey. Through its concentrated focus on technology, innovations, and partnerships, Redington is one of the most trusted distributors of products, services, and solutions across the world.

**About - Eastman Auto & Power Ltd:**

Eastman Auto & Power Limited (EAPL) is a leading player in the energy transition space, offering innovative solutions across energy generation, storage, and utilization. The company operates in three key verticals: Last-Mile E-Mobility, Solar Solutions, and Continued Energy Solutions.

Eastman delivers a wide range of technology-driven products, including energy storage systems and power conversion solutions designed for solar and backup applications. With a strong manufacturing base and an expanding global footprint, the company is committed to driving clean, accessible, and reliable energy solutions. Backed by a deep-rooted distribution and service network, Eastman partners with OEMs and end-users to deliver seamless energy experiences. Through continuous innovation and customer-centricity, the company is helping accelerate the shift toward sustainable and self-reliant energy ecosystems — both in India and internationally.
