

Eastman Auto & Power showcases lithium products at EV Show

Chennai, Sep 26:

Eastman Auto & Power Ltd, a company specializing in Last Mile E-Mobility Solutions, Continued Energy Solutions and Solar Rooftop Solutions showcased its innovative products from the lithium category at the India EV International Show held in Chennai.

The event was one of the largest platforms for EV technologies in the country, bringing together industry leaders, innovators, and enthusiasts to explore the future of electric mobility.

The company unveiled its latest range of lithium

batteries, designed to enhance the efficiency and performance of electric vehicles. These products not only align with the growing demand

in the industry but also emphasize Eastman's dedication to quality and innovation.

Eastman Auto & Power Ltd remains committed to

leading the charge in the EV sector by investing in research and development, and fostering strategic partnerships to enhance its product offerings.
